SUMMARY

Full-Stack Developer specializing in React and Next.js for frontend, with backend experience in C++, C#, .NET, ASP.NET Core, and PostgreSQL. I also work with Figma and can turn product ideas, UI designs, and business requirements into clean, scalable, production-ready web applications.

FRONTEND

HTML CSS JavaScript TypeScript React Next.js
Tailwind CSS Shadcn UI MUI Ant Design Sass
TanStack Query Zustand Zod Framer Motion

BACKEND & TOOLS

C++ C# .NET ASP.NET Core PostgreSQL REST APIs
Figma Git GitHub Vercel Netlify VS Code Cursor

EXPERIENCE

Full-Stack Developer - Trianon Energy

April 2026 - Present | On-site

Building modern web interfaces and supporting backend integrations for electric vehicle charging station systems, with a focus on performance, usability, and scalable architecture.

- Developing performance-optimized landing pages and data-driven dashboards.
- Integrating APIs, high-volume data flows, and AI-based features into web applications.
- Translating business requirements into maintainable full-stack solutions.

Full-Stack Developer - UProject

July 2025 - January 2026 | On-site

Worked on scalable, high-performance web applications with modern UI/UX, clean API integration, reusable frontend components, and production-ready delivery workflows.

- Developed responsive and reusable UI components using React and Next.js.
- Improved application performance and user experience through optimization techniques.
- Collaborated with designers and backend workflows to ship production-ready features.
